EDUCATION

University of California, Los Angeles (UCLA)

Expected June 2028

Henry Samueli School of Engineering and Applied Science, Bachelor of Science (B.S.) in Computer Science

Relevant Coursework: Logic Design of Digital Systems, Algorithms and Complexity, Data Management Systems, Artificial Intelligence, Machine Learning

WORK EXPERIENCE

Research Assistant, Department of Geophysics in the Stanford Doerr School of Sustainability

June 2026 - September 2026

Advisor: Professor Rosemary J. Knight and Ph.D. Candidate Jonathan Mells

- Georeferenced and spatially digitized historical USGS geologic plates in ArcGIS Pro, converting raster maps into control-point-registered vector layers aligned with modern Corcoran Clay datasets.
- Built a spatial well-log database by geoprocessing USGS subsurface texture records into queryable GIS point feature classes, supporting spatial modeling of the Corcoran Clay confining unit within the Central Valley aquifer system.
- Developed a comparative data-evaluation framework assessing airborne electromagnetic (AEM) survey data against legacy well-log records to identify optimal subsurface data sources for aquifer characterization, supporting research on sustainable groundwater management in California's Central Valley.

Research Assistant, Stanford Project on Adaptation and Resilience in Kids, SPARK Lab

June 2026 - August 2026

Advisor: Professor Jelena Obradović and Postdoctoral Scholar Meriah L. DeJoseph

- Designed an AI-powered literature review pipeline to automate literature review based on domain expertise.
- Built a multi-stage AI pipeline to accelerate literature reviews, reducing manual screening time for research staff.
- Evaluated an AI Skill-based architecture to maximize long-term maintainability through text-based specification edits.

SKILLS

- Coding Languages: C/C++, Python, Java, MATLAB, ASM, JavaScript, HTML/CSS, PHP, SQL
- Tools and Platforms: GitHub, Adobe Creative Cloud, Figma, Autodesk Fusion, ArcGIS
- Spoken Languages: English (Native), Mandarin (Native)

LEADERSHIP AND STUDENT ORGANIZATION INVOLVEMENT

Engineering Society at UCLA (ESUC)

Publicity Chair

March 2026 - Present

- Manage ESUC's social and networking accounts, growing engagement and visibility for club events and initiatives.
- Design promotional flyers and coordinate student leader outreach to execute targeted marketing campaigns.
- Support intern recruitment efforts at Engineering Welcome Day and all Club Fairs; coordinate officer headshots for club branding.

Society of Women Engineers (SWE) at UCLA

Outreach Committee Publicity

June 2026 - Present

- Promote K-12 outreach initiatives that introduce girls to engineering through hands-on activities and STEM exposure.
- Design marketing materials and manage publicity strategy to increase event participation and recruitment of women in engineering.
- Build partnerships between the Outreach Committee and community organizations to plan inclusive, empowering STEM events.

Project Scientist Activity Lead

September 2025 - June 2026

- Expand access to STEM education for elementary through high school students across the LA area, reaching 150+ girls.
- Design and lead hands-on activities for the flagship Project Scientist event for elementary students.
- Coordinate event logistics, supply planning, and activity design to support K-12 STEM programming.

American Society of Civil Engineers (ASCE) at UCLA

Seismic Outreach Project Manager

June 2026 - Present

- Lead the Seismic Outreach project, coordinating curriculum and timelines to reach 150+ students per quarter across 3 quarters.
- Design earthquake engineering activities that teach K-12 students seismic safety and structural concepts.
- Partner with ASCE officers to plan events and expand outreach materials.
